SUBJECT INDEX

Algorithms

Area of Irregular Region With Unequal Intervals, Said M. Easa, SU May 88 p50-58.

GPS at Nottingham University, Vidal Ashkenazi, Clive de la Fuente and Terry Moore, SU Nov. 88 p146-155.

Boston

GPS Surveys and Boston's Central Artery/Third Harbor Tunnel Project, W. J. Trevor Greening, SU Nov. 88 p165-171.

Boundaries, properties

Technical Standards for Boundary Surveys Developing Model Law, Harlan J. Onsrud, Mathew C. Swanson and Steven D. Johnson, SU June 87 p101-115.

Centroid

Improved Method for Locating Centroid of Earthwork, Said M. Easa, SU Feb. 88 p13-25.

Comparative studies

A Comparison: Static and Future Kinematic GPS Surveys, Kevin P. Logan, SU Nov. 88 p195-201.

Computer programs

GPS at Nottingham University, Vidal Ashkenazi, Clive de la Fuente and Terry Moore, SU Nov. 88 p146-155.

Conversion

Coordinate Conversion from NAD 27 to NAD 83, D. R. Graff, SU Aug. 88 p125-130.

Coordinates

Coordinate Conversion from NAD 27 to NAD 83, D. R. Graff, SU Aug. 88 p125-130.

Coordinate Systems Used in Geodesy: Basic Definitions and Concepts, Tomás Soler and Larry D. Hothem, SU May 88 p84-97.

Use of GPS-Derived Coordinates in GIS Environment, Thomas E. Henderson and Cheryl A. Quirion, SU Nov. 88 p202-208.

Curricula

Surveying Engineering Education for the 21st Century, J. E. Colcord, SU Feb. 88 p37-46.

Dams

A Comparison: Static and Future Kinematic GPS Surveys, Kevin P. Logan, SU Nov. 88 p195-201.

Definitions

Coordinate Systems Used in Geodesy: Basic Definitions and Concepts, Tomás Soler and Larry D. Hothem, SU May 88 p84-97.

Deformation

Special Survey Instrumentation for Deformation Measurements, W. F. Teskey, SU Feb. 88 p2-12.

Digital mapping

Shift to Digital Mapping: "Points of Impact" on Management, David J. Coleman and John D. McLaughlin, SU May 88 p59-70.

Distribution

Simulating Disturbances in GPS by Continuous Satellite Distribution, Alain Geiger, SU Nov. 88 p182-194.

Disturbances

Simulating Disturbances in GPS by Continuous Satellite Distribution, Alain Geiger, SU Nov. 88 p182-194.

Documentation

Draft Right-of-Way Guide, Task Committee on Right-of-Way of the American Society of Civil Engineers, SU Aug. 88 p131-142.

Earthwork

Improved Method for Locating Centroid of Earthwork, Said M. Easa, SU Feb. 88 p13-25.

Easements

Draft Right-of-Way Guide, Task Committee on Right-of-Way of the American Society of Civil Engineers, SU Aug. 88 p131-142.

Engineering

History of Engineering Surveying, William E. Kreisle, SU Aug. 88 p102-124.

Engineering education

Surveying Engineering Education for the 21st Century, J. E. Colcord, SU Feb. 88 p37-46.

Error analysis

Simulating Disturbances in GPS by Continuous Satellite Distribution, Alain Geiger, SU Nov. 88 p182-194.

Excavation

Estimating Pit Excavation Volume Using Nonlinear Ground Profile, Said M. Easa, SU May 88 p71-83.

Finite element method

Special Survey Instrumentation for Deformation Measurements, W. F. Teskey, SU Feb. 88 p2-12.

Geodesy

Coordinate Systems Used in Geodesy: Basic Definitions and Concepts, Tomás Soler and Larry D. Hothem, SU May 88 p84-97.

Geodetic surveys

A Comparison: Static and Future Kinematic GPS Surveys, Kevin P. Logan, SU Nov. 88 p195-201.

GPS Geodetic Reference System in Tennessee, James H. Zeigler, SU Nov. 88 p156-164.

GPS in Support of LIS: Project CONSOIL, Dane County, Wisconsin, David K. Krohn, Alan P. Vonderohe and David F. Mezera, SU Nov. 88 p172-181.

GPS Surveys and Boston's Central Artery/Third Harbor Tunnel Project, W. J. Trevor Greening, SU Nov. 88 p165-171.

MINI-MAC® Model 2816 GPS Surveyor, Jimmy D. Cain, SU Nov. 88 p209-216.

Geography

Use of GPS-Derived Coordinates in GIS Environment, Thomas E. Henderson and Cheryl A. Quirion, SU Nov. 88 p202-208.

Global positioning

A Comparison: Static and Future Kinematic GPS Surveys, Kevin P. Logan, SU Nov. 88 p195-201.

GPS at Nottingham University, Vidal Ashkenazi, Clive de la Fuente and Terry Moore, SU Nov. 88 p146-155.

GPS Geodetic Reference System in Tennessee, James H. Zeigler, SU Nov. 88 p156-164.

GPS in Support of LIS: Project CONSOIL, Dane County, Wisconsin, David K. Krohn, Alan P. Vonderohe and David F. Mezera, SU Nov. 88 p172-181.

GPS Surveys and Boston's Central Artery/Third Harbor Tunnel Project, W. J. Trevor Greening, SU Nov. 88 p165-171.

MINI-MAC® Model 2816 GPS Surveyor, Jimmy D. Cain, SU Nov. 88 p209-216.

Simulating Disturbances in GPS by Continuous Satellite Distribution, Alain Geiger, SU Nov. 88 p182-194.

Use of GPS-Derived Coordinates in GIS Environment, Thomas E. Henderson and Cheryl A. Quirion, SU Nov. 88 p202-208.

Grid systems

Estimating Pit Excavation Volume Using Nonlinear Ground Profile, Said M. Easa, SU May 88 p71-83.

Harbors

GPS Surveys and Boston's Central Artery/Third Harbor Tunnel Project, W. J. Trevor Greening, SU Nov. 88 p165-171.

Highway planning

Use of GPS-Derived Coordinates in GIS Environment, Thomas E. Henderson and Cheryl A. Quirion, SU Nov. 88 p202-208.

History

History of Engineering Surveying, William E. Kreisle, SU Aug. 88 p102-124.

Irregular boundaries

Area of Irregular Region With Unequal Intervals, Said M. Easa, SU May 88 p50-58.

Kinematics

A Comparison: Static and Future Kinematic GPS Surveys, Kevin P. Logan, SU Nov. 88 p195-201.

GPS at Nottingham University, Vidal Ashkenazi, Clive de la Fuente and Terry Moore, SU Nov. 88 p146-155.

MINI-MAC® Model 2816 GPS Surveyor, Jimmy D. Cain, SU Nov. 88 p209-216.

Land information systems

GPS in Support of LIS: Project CONSOIL, Dane County, Wisconsin, David K. Krohn, Alan P. Vonderohe and David F. Mezera, SU Nov. 88 p172-181.

Land surveys

Technical Standards for Boundary Surveys Developing Model Law, Harlan J. Onsrud, Mathew C. Swanson and Steven D. Johnson, SU June 87 p101-115.

Legal factors

Technical Standards for Boundary Surveys Developing Model Law, Harlan J. Onsrud, Mathew C. Swanson and Steven D. Johnson, SU June 87 p101-115.

Levelling

GPS at Nottingham University, Vidal Ashkenazi, Clive de la Fuente and Terry Moore, SU Nov. 88 p146-155.

Management

Shift to Digital Mapping: "Points of Impact" on Management, David J. Coleman and John D. McLaughlin, SU May 88 p59-70.

Measurement

Simulating Disturbances in GPS by Continuous Satellite Distribution, Alain Geiger, SU Nov. 88 p182-194.

Measuring instruments

Special Survey Instrumentation for Deformation Measurements, W. F. Teskey, SU Feb. 88 p2-12.

Monitoring

A Comparison: Static and Future Kinematic GPS Surveys, Kevin P. Logan, SU Nov. 88 p195-201.

Monitoring of High-Rise Buildings, Gunther Greulich and Clifford E. Rober, SU Feb. 88 p26-36.

Monuments

Draft Right-of-Way Guide, Task Committee on Right-of-Way of the American Society of Civil Engineers, SU Aug. 88 p131-142.

Navigation

GPS at Nottingham University, Vidal Ashkenazi, Clive de la Fuente and Terry Moore, SU Nov. 88 p146-155.

New Mexico

Use of GPS-Derived Coordinates in GIS Environment, Thomas E. Henderson and Cheryl A. Quirion, SU Nov. 88 p202-208.

Nonlinear systems

Estimating Pit Excavation Volume Using Nonlinear Ground Profile, Said M. Easa, SU May 88 p71-83.

North American datum

Coordinate Conversion from NAD 27 to NAD 83, D. R. Graff, SU Aug. 88 p125-130.

Organization theory

Shift to Digital Mapping: "Points of Impact" on Management, David J. Coleman and John D. McLaughlin, SU May 88 p59-70.

Platting

Draft Right-of-Way Guide, Task Committee on Right-of-Way of the American Society of Civil Engineers, SU Aug. 88 p131-142.

Polynomials

Area of Irregular Region With Unequal Intervals, Said M. Easa, SU May 88 p50-58.

Profiles

Estimating Pit Excavation Volume Using Nonlinear Ground Profile, Said M. Easa, SU May 88 p71-83.

Quadratic formulas

Area of Irregular Region With Unequal Intervals, Said M. Easa, SU May 88 p50-58.

Receivers

MINI-MAC® Model 2816 GPS Surveyor, Jimmy D. Cain, SU Nov. 88 p209-216.

Refraction

GPS at Nottingham University, Vidal Ashkenazi, Clive de la Fuente and Terry Moore, SU Nov. 88 p146-155.

Right of way

Draft Right-of-Way Guide, Task Committee on Right-of-Way of the American Society of Civil Engineers, SU Aug. 88 p131-142.

Satellites

Simulating Disturbances in GPS by Continuous Satellite Distribution, Alain Geiger, SU Nov. 88 p182-194.

Simulation

Simulating Disturbances in GPS by Continuous Satellite Distribution, Alain Geiger, SU Nov. 88 p182-194.

Social aspects

Technical Standards for Boundary Surveys Developing Model Law, Harlan J. Onsrud, Mathew C. Swanson and Steven D. Johnson, SU June 87 p101-115.

Standards

Technical Standards for Boundary Surveys Developing Model Law, Harlan J. Onsrud, Mathew C. Swanson and Steven D. Johnson, SU June 87 p101-115.

State laws

Technical Standards for Boundary Surveys Developing Model Law, Harlan J. Onsrud, Mathew C. Swanson and Steven D. Johnson, SU June 87 p101-115.

Statics

A Comparison: Static and Future Kinematic GPS Surveys, Kevin P. Logan, SU Nov. 88 p195-201.

Structural behavior

Special Survey Instrumentation for Deformation Measurements, W. F. Teskey, SU Feb. 88 p2-12.

Structural control

Monitoring of High-Rise Buildings, Gunther Greulich and Clifford E. Rober, SU Feb. 88 p26-36.

Surveying

Draft Right-of-Way Guide, Task Committee on Right-of-Way of the American Society of Civil Engineers, SU Aug. 88 p131-142.

GPS at Nottingham University, Vidal Ashkenazi, Clive de la Fuente and Terry Moore, SU Nov. 88 p146-155.

History of Engineering Surveying, William E. Kreisle, SU Aug. 88 p102-124.

Surveying Engineering Education for the 21st Century, J. E. Colcord, SU Feb. 88 p37-46.

Surveys

Special Survey Instrumentation for Deformation Measurements, W. F. Teskey, SU Feb. 88 p2-12.

Tall buildings

Monitoring of High-Rise Buildings, Gunther Greulich and Clifford E. Rober, SU Feb. 88 p26-36.

Tennessee

GPS Geodetic Reference System in Tennessee, James H. Zeigler, SU Nov. 88 p156-164.

Terminology

Coordinate Systems Used in Geodesy: Basic Definitions and Concepts, Tomás Soler and Larry D. Hothem, SU May 88 p84-97.

Three-dimensional analysis

GPS Geodetic Reference System in Tennessee, James H. Zeigler, SU Nov. 88 p156-164.

Tunnels

GPS Surveys and Boston's Central Artery/Third Harbor Tunnel Project, W. J. Trevor Greening, SU Nov. 88 p165-171.

U.S. Army Corps of Engineers

A Comparison: Static and Future Kinematic GPS Surveys, Kevin P. Logan, SU Nov. 88 p195-201.

Volume measure

Estimating Pit Excavation Volume Using Nonlinear Ground Profile, Said M. Easa, SU May 88 p71-83.

Wisconsin

GPS in Support of LIS: Project CONSOIL, Dane County, Wisconsin, David K. Krohn, Alan P. Vonderohe and David F. Mezera, SU Nov. 88 p172-181.

AUTHOR INDEX

Ashkenazi, Vidal
GPS at Nottingham University, with Clive de la Fuente and Terry Moore, SU Nov. 88, p146-155

Cain, Jimmy D.
